

AUTHORIZED PERSON – 8 hrs

Designed for those employees assigned by their employer and who may be exposed to a fall hazard while performing specific duties at a specific location(s), this 2-day course teaches students how to work with their competent person to preplan workplace activities. The course includes how to perform a fall hazard survey, review fall protection equipment manufacturer instructions to properly select, use, maintain and store fall protection equipment, anchorage verification, clearance verification, rescue, and OSHA regulations and ANSI standards for equipment.
